WORK HISTORY

Physician Assistant - October, 2015 to Present

Lenox Hill Hospital - New York, NY

- Examined patients and diagnosed conditions such as acute coronary syndrome, unstable angina, atrial fibrillation, congestive heart failure, syncope, hypertensive emergency, symptomatic bradycardia, heart valve disorders, symptomatic anemia, and peripheral vascular disease, on a regular basis.
- Gathered comprehensive patient histories and completed physical examinations to get a full picture of the patients' health.
- Was in charge of managing and updating individualized care plans in order to help patients regain and maintain their health.
- Ordered and executed various tests, analyses, and diagnostic images to provide information on the patient's condition.
- Performed hospital rounds during the day, evening, and night shifts in support of up to 10 member physician staff.
- Prepared patients for surgery, scheduled cases, and appropriate diagnostic tests by educating them.
- Met with patients to talk about their medical histories and current issues.
- Conducted physical assessments of relevant body areas and tested responses using standardized tests.
- Developed a strong rapport with patients by listening intently and empathizing with their circumstances.
- Educated patients on a variety of infectious disease issues, nutrition, obesity, and smoking cessation to improve overall health and wellness.
- Was in charge of ordering, interpreting, and reviewing Chest Xrays, CT/MRI scans, Ultrasounds, and a wide range of laboratory testing.
- Quickly analyzed and responded to critical situations such as cardiovascular, abdominal, and neurological in emergency situations.
- Recorded complete medical histories, treatment progress, and evaluation data in Sunrise.
- Updated patient records to include test results, diagnoses, and treatment plans for the supervising physician to review.
- Worked with other services such as internal medicine, endocrine, renal, gastrointestinal, cardiothoracic surgery, pulmonary, and critical care specialists.
- Helped with the implementation of a rigorous quality assurance and compliance program to ensure that the hospital's standard of care was met.

CERTIFICATIONS

- ACLS
- BLS
- Infection control
- Conscious sedation
